

Workshop for Parents, Therapists & Professionals

Andrea Radcliffe is a Senior Program Supervisor at Autism Partnership in Melbourne and has worked in the field of contemporary behaviour analysis for over 10 years.

Andrea's experience spans across her work in Canada, Queensland, and the USA, which included a 12 month internship at the Autism Partnership California clinic. Andrea supervises home-based programs, consults in educational settings and presents at training workshops for parents, therapists and professionals.

Behaviour Management:

Practical Strategies to Teach Behaviour Management to Children on the Autism Spectrum

Presented by: Andrea Radcliffe

Autism Partnership's approach to behaviour management is based on determining the reasons behind the behaviours a child displays. Once this is known, we can help a child to develop more functional alternative responses. The workshop will investigate the various functions of behaviour, and provide participants with practical solutions to alleviate specific problematic behaviours. The emphasis is twofold: 1) how to manage challenging behaviours, 2) what to teach a child to do instead.

- Understanding Behaviour
- Identifying Function of Behaviour
- Developing Behaviour Plans
